

Health Professions

Health Professions Day October 7, 2009

Each year **Chadron State College** hosts an informative health career day for persons interested in learning how they can become a health care provider. Faculty and staff from the University of Nebraska Medical Center, along with local health care professionals, will present sessions on different health care occupations, including RHOP—the Rural Health Opportunities Program. These sessions will cover the responsibilities and opportunities of the occupation as well as the curriculum required to obtain a degree for the health care profession.

Participants are given the opportunity to attend three different sessions throughout the day. Our hope is to provide students the knowledge necessary to make wise decisions about the career they intend to pursue in the health care field.

A favorite of the day is the student panel consisting of current CSC health professions students. They will be available to make comments and answer questions.

Agenda
